

## **Quantitative Proteomics – 2D-DIGE End of Year Discount-15%**

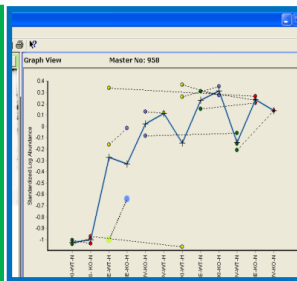

ITSI-Biosciences is excited to offer a special 15% end of year discount on our very popular Two Dimensional Difference In Gel Electrophoresis (2D-DIGE) semi-quantitative proteomics service. 2D-DIGE is the benchmark for gel-based proteomics and thousands of papers have been published in reputable journals based on 2D-DIGE.

2D view of a pseudo colored 2D-DIGE gel

Simulated 3D view of a selected spot

Expression level of the selected spot in 12 samples

### **Our Standard Service Includes:**

- Experimental Design.
- Sample preparation.
- 1<sup>st</sup> dimension separation using narrow or wide-range IPG strips.
- 2<sup>nd</sup> dimension separation using large format gels.
- Difference in gel (DIGE) and/or biological variation (BVA) analysis using DeCyder software.
- Statistical assessment of the significance of the differential expression.
- Robotic picking and in-gel digestion of candidate protein spots of interest.
- Identification of candidate protein spots by LC-MS/MS (aka tandem mass spectrometry).
- Database search and protein annotation.

For more details please visit the 2D-DIGE page and watch the video (<http://www.itsibio.com/2d-dige.html>). We accept all types of biological and clinical samples, and results are returned to most clients in 2 weeks. Offer is valid from November 1, 2015 - December 31, 2015. This offer may not be combined with any other discounts. Visit our [Website](#) or call 1-814-262-7331 to place an order today. **Use promo code "S110115" when placing your order.**
